Military experts declare that in future battles the victors will be the ones who have most icompletely mastered the air The governments are all giving much attention to balloons and flying machines at present.

I wish to pass on this little sermon to mothers: Be carefu! to keep the weeds out of the minds of your children as you are to keep them out of your garden. But remember something will grow there. If you do not plant them with good grain, the tares will take root in spite of you. Keep a library of good, clean Spangler, were married by Rev. books, and by all means keep before them good magazines.-Mrs. parsonage Wedne day evening. Wood.

We are in receipt of the 38th ennual catalogue of the Missouri burg which shows the institution to be in fine condition and ably managed. There are about two thousand students annually a numbber of them from Saline. Notice the schools advertisement elsewhere.

/ Mr. Cowherd forgot "where he was at" when he talked about Republicans getting "a look at the books" to a Henry county audience, A Republican Secretary of State got a look at some bank books in Clinton and landed a Democratic banker, chairman of the county committee, custodian of the county, city and school funds, in the penitentiary. There are poor widows and orphans in Henry county who wish a Republican official had looked at those books a few years sooner. Maybe they would not now be dependent upon their daily labor for a livelihood-Booneville Republican.

Motorcycle as Mail Carrier

Iowa, Falls, Ia., July 31-A rual carrier named Hadley, on one of the routes running out of this city, is demonstrating that the motorcycle in the rural service may become a new factor in the delivery of mail. He has just put into service a motorcycle and the saving of time is remarkable. His route is twentyfive miles long and he serves seventy-five patrons. He can cover the route and stop at each of the boxes on his route in two hours, and says he can even reduce this record a half hour.

Heretofore, with the old modes of conveyance he has required from six to eight hours, so that the new method of transportation makes such a big saving in time that it is attracting the attention of other carriers, who readily realize the possibilities of the time-saving motorcycle,
